Watch charging indicator ⑫

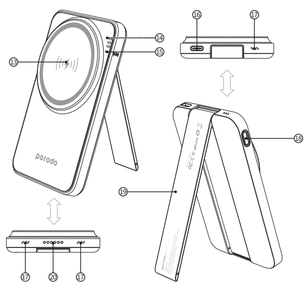
Standby mode	Green light on
Charging mode	Green light breathing

Power Bank

Power Bank-Specifications

- Battery: 5000mAh
- USB-C Input: 18W 5V/2.5A, 9V/2A, 12V/1.5A
- USB-C PD Output: 20W 5V/2.4A, 9V/2.22A, 12V/1.5A
- Wireless Output: 5W/7.5W/10W

Power Bank-Product Structure

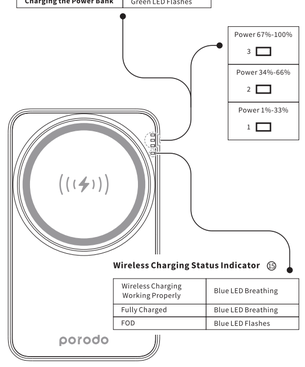


⑬ Wireless Charging Area ★P19
⑭ Power Rate Indicator ★P9
⑮ Wireless Charging Status Indicator ★P9
⑯ Pass-through charging via Type C Input/Output ★P20-P21
⑰ Heat Dissipation Hole
⑱ Switch ★P18
⑲ Foldable & Adjustable Aluminum Stand (0-180°) ★P10
⑳ Copper Sheet for the Charging Dock ★P13

Power Bank-LED Usage

Power Rate Indicator ⑭

Fully Charged	Green LED Stays On
Low Battery	The 1st LED Flashes
Charging the Power Bank	Green LED Flashes

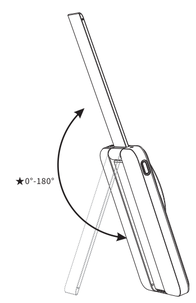


Wireless Charging Status Indicator ⑮

Wireless Charging Working Properly	Blue LED Breathing
Fully Charged	Blue LED Breathing
FOD	Blue LED Flashes

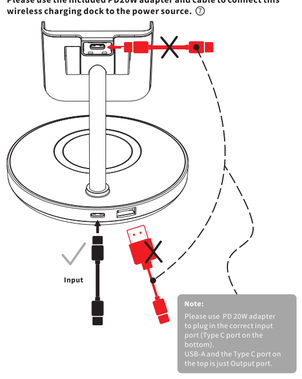
Power Bank-Stand ⑲

The stable stand of this power bank is not only for the angle-adjusting, but also can be folded to flat for travelling. You can adjust the angle(0-180°) according to your needs.
When you need not to charge, you can use it as a simple MagSafe stand to support your phone (in horizontally or vertically). Just need depressing the switch by double quick press.
Please Note: Certain Vibration will restart the Charging Again.



Wireless Charging Dock-How To Use

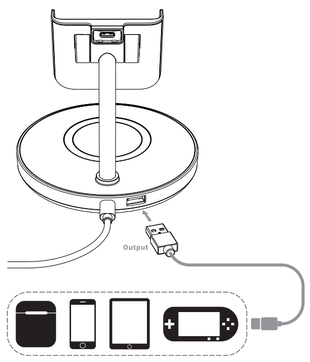
Please use the included PD20W adapter and cable to connect this wireless charging dock to the power source. ⑦



Note:
Please use PD 20W adapter to plug in the correct input port (Type C port on the bottom).
USB-A and the Type C port on the top is just Output port.

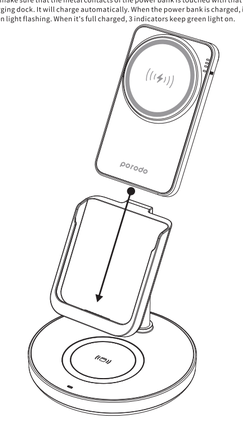
Wireless Charging Dock - Extra USB Output ⑧

Using the USB-A to Type-C cable(Not included), connect the USB-A cable into the dock and the other side to the devices you want to charge, such as iPad, phone, earphone, Switch and so on.



Wireless Charging Dock - Wireless Charging for power bank ⑨

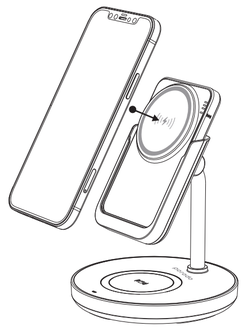
After connecting the power source, please put the power bank in the charging dock and make sure that the metal contacts of the power bank is touched with that of charging dock. It will charge automatically. When the power bank is charged, it's green light flashing. When it's full charged, 3 indicators keep green light on.



Wireless Charging for phone

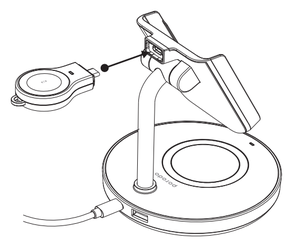
Please fit the product with the back of your iPhone (12, 13, 14 series) or other wireless charging phone (which with Magsafe case) it will charge your phone automatically via the built-in magnetic wireless charging, Max to be 15W, iPhone series is 7.5W due to iPhone's restrict.

Note:
If power bank and phone are charged simultaneously, it's fast wireless charging for phone while power bank is in slow charging. When the phone full charged, the power bank is in fast charging mode.



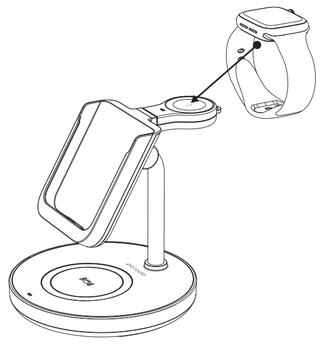
Wireless Charging Dock - Wireless charging for Apple Watch ⑥

Please remove the case of watch charger and inserted it into the corresponding position of charging dock.



Wireless Charging Dock - Wireless charging for Apple Watch ⑤

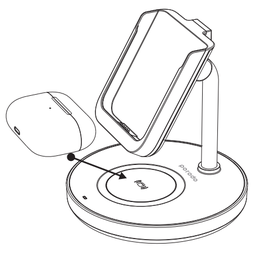
Please make sure your Apple Watch is corresponded to the area of the wireless charger for Apple Watch. It will automatically detect the Apple Watch and charge it.



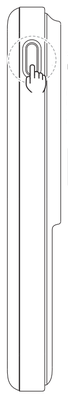
Note:
This product is only available for Apple Watch. If Samsung watch, it's not compatible.

Wireless Charging Dock - Wireless charging for TMS earphone ④

Please lay down your earphone on the charging area and then it will automatically detect and charge(5W Max).



Power Bank-Use Of Switches ⑱



Single Press: Turn on
Double Press: Turn Off

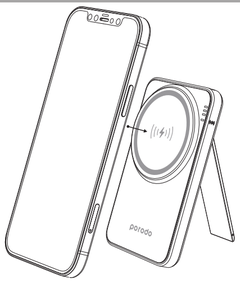
Press the switch once to power on the product the battery indicator will light up. Then it is in the standby state and other devices can be charged.
Press the switch twice continuously, then the output will turn off.

Tips:
In standby mode it will turn off automatically after about 35 seconds without performing other .

Power Bank-Wireless Charging Operation ⑬

Please fit the product with the back of your iPhone (12, 13, 14 series or Airpods 3) or other wireless charging phone (which with Magsafe-compitable ring attached, it will charge your phone automatically via the built-in magnetic wireless charging, Max to be 15W, iPhone series is 7.5W due to iPhone's restrict.

Note:
1. The magnetic wireless power bank is mainly used for iPhone 12, iPhone 13, iPhone 14 series, or phones with Magsafe-compitable ring attached (Please note some of Magsafe-compatible rings from the 3rd might not work). And it can also used with Airpods 3.
2. The power bank has a built-in vibration sensor when you place the iPhone or Airpods 3 in the charging area, then charging will automatically turn on (If you just want to use the magnetic stand function, just double-click on the power switch to turn off the charging function).

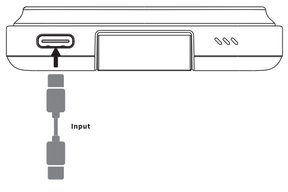


Charging The Power Bank ⑯

Please recharge the product when the power or battery is low.
1.Using the included cable (like USB-A to Type-C cable or C TO C), connect the USB-A or C connector into QC/PD adapter and the Type-C connector to the input connector of the power bank.
2.During charging, Green LED indicators will flash to show charging status.
3.When charging is complete the Green LED indicators will stays on.

Pass Through Charging
You can put (Stick to) your iPhone 12/13/14 series, Airpods 3 on the wireless charging area and connect this power bank to the power source (PD or QC Adapter). It will charge the power bank itself and your iPhone12/13/14/Airpods 3 at the same time.

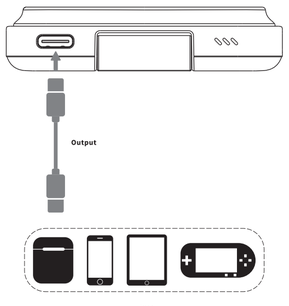
Note:
While charging, the phone will be in fast charging and power bank is in a slow charging. When phone is fully charged, the power bank is in fast charging mode.



Power Bank Operation ⑮

1. Insert the charging cable Type C end into Output.
2. Plug the other end of the cable into a terminal such as phone.
3. Using the USB-A to Type-C or C-C cable (Not included), connect the C cable into the power bank and the other side to the devices you want to charge, such as iPad, phone, earphone, Switch and soon.

Note:
When one device is charged by the power bank, whether C port or wireless charging area, the output supports fast charging. If two devices are charged at the same time, the maximum output power is 5V/3A, no fast charging.



Warning

- Do not drop, misuse or apply excessive force to your power bank. Power banks contain batteries and a circuit board with fragile components that can be damaged if misused.
- If your power bank swells or bulges, stop use immediately and dispose of the power bank in an appropriate manner.
- Store power bank in a cool and dry place. Do not store in hot or humid environments.
- All power banks have safety power cut off features to stop overcharging & overheating.
- When charging a device the power bank may feel warm, this is a normal operating condition & should not be cause for concern.
- It's normal that this charger and your smart phone will be hot under operating conditions and it may be more hotter when charging and using at the same time (such as playing music).
- In normal conditions, battery performance will decline over several years.

Remarks

When your wireless power bank works improperly
1.Make sure there is no any clutters on the wireless power bank, such as magnet, metal, credit card and other foreign object.
2.When the wireless power bank is over-heating take your mobile device away from your wireless power bank and the power bank will stop charging automatically when over-heating. Please try charging again when the wireless power bank cooling down.
