Product Overview

The Riva 60W Dual USB-C Car Charger is a high-performance accessory designed to meet the charging needs of modern devices. Featuring dual USB-C ports, it enables simultaneous charging of multiple devices at once, ensuring efficient power distribution. The charger is equipped with an indicator light for easy monitoring of charging status and comes with an auto shut-off function that ensures safety by shutting off power once devices are fully charged. With its sleek and compact design, it is perfect for use in vehicles, offering a reliable and convenient solution for powering smartphones, tablets, and other USB-C compatible devices while on the go.

Specifications

Input Voltage	12-24V
USB-C1 Output	5V/3A, 9V/3A, 12V/2.5A, 30W Max
USB-C2 Output	5V/3A, 9V/3A, 12V/2.5A, 30W Max
Total Output	60W Max
Cable Included	1m 27W USB-C to Lightning
Model Number	PBCCR50

Product Features

- a.** Two PD 60W Super Fast Charging capability.
- b.** 30W USB-C high power output, ideal for quickly charging phones, iPads, and other devices in the car.
- c.** USB-C output with built-in charging indicator light; dark light to easily locate the charging port.
- d.** Made from fire-retardant PC materials with a durable shell that resists scratches and features a bright, attractive finish.
- e.** Smart chip design adapts to different devices for optimal charging, also including power-off protection.
- f.** Does not harm your mobile phone battery; ensures safe and reliable charging.
- g.** For devices that do not support fast charging, it automatically adjusts to allocate the appropriate current, enabling fast charging.

Precautions

- 1.** Car charging should not be used in high temperatures, particularly when the car temperature exceeds 45°C (commonly during summer). Remember to unplug the charger when it is not being used. Avoid impacts, drops, or vibrations as these may damage the internal circuit board.
- 2.** Do not insert the car charger before starting the vehicle. Inserting it while the engine is off may result in voltage surges that can harm the charger.
- 3.** Avoid using strong cleaning agents or chemicals near the charger, as these can cause severe corrosion and damage to the car. Make sure to clean carefully.
- 4.** Remember to unplug the car charger after the vehicle is turned off. While many vehicles stop supplying power once the key is removed, there are still some that continue to provide power even when the engine is off.

5. Avoid exposing the car charger to water or placing it in a humid environment for extended periods, as this can lead to oxidation and corrosion of the internal components.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **<https://www.porodo.net/warranty>** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
