Product Overview

The Porodo 2000W EU Plug Universal Socket is a versatile and reliable solution designed to meet your power needs. Made with durable PC, ABS, and copper materials, this socket ensures high performance and safety. It supports a wide voltage range from 220V to 250V and operates at a frequency of 50/60Hz. With a maximum power rating of 2000W and a current capacity of 16A, it is capable of handling various devices with ease. The socket is designed with a standard EU plug, making it compatible with a wide range of appliances. Compact and lightweight, the socket weighs only 42g and has a product size of 53 x 53mm, making it easy to carry and use in any setting.

Specifications

Material	PC+ABS+Copper
Rated Voltage	220V-250V
Rated Frequency	50/60 Hz
Rated Power	2000W
Maximum Current	16A
Power Cord	EU Plug
Product Weight	42g
Product Size	53 x 53mm
Model Number	PDKT178

Product Features

- a.** Compatible with a wide range of EU plug devices: This universal socket is designed to fit all EU plugs, making it highly versatile and suitable for various electronic devices and appliances that use EU plugs.
- b.** Rated power of 2000W for efficient energy transfer: With a power rating of 2000W, this socket can support high-powered devices, ensuring that they receive the required amount of energy for optimal performance.
- c.** Supports a maximum current of 16A for high-powered devices: The socket can handle up to 16A of current, making it ideal for devices that require substantial current for operation, such as home appliances and electronic equipment.
- d.** Rated voltage range of 220V to 250V for versatile use: The socket operates within a voltage range of 220V to 250V, allowing it to be used in different electrical environments without risk of malfunction.
- e.** Durable construction using PC, ABS, and copper materials for reliability: The socket is made from high-quality materials—PC (Polycarbonate), ABS (Acrylonitrile Butadiene Styrene), and copper—which ensure strength, durability, and long-term performance.
- f.** Compact and lightweight design, weighing only 42g: Weighing just 42g, the socket is lightweight and portable, making it easy to carry and use in various settings, whether at home or on the go.
- g.** Product size of 53 x 53mm for easy portability: Its compact size (53mm x 53mm) makes the socket easy to store and transport, fitting comfortably in bags or drawers for convenient access.
- h.** Designed for use with standard EU plugs: This socket is specifically designed for EU plug compatibility, ensuring a perfect fit and safe usage with all standard EU devices.
- j.** Quality-tested to ensure safety and performance: The socket undergoes thorough testing to meet safety standards, ensuring reliable performance and protection for both users and devices.

Safety Instructions

- 1.** Ensure that the total power load does not exceed the 2000W rating of the socket. Overloading the socket may cause overheating, damage to the device, or electrical hazards. Always check the power requirements of your connected devices before use.
- 2.** Avoid using the socket in wet or damp environments. Exposure to moisture can lead to electrical shocks or short circuits. Ensure the socket is used only in dry areas to maintain safety and performance.
- 3.** Always handle the socket with dry hands and avoid plugging or unplugging it when your hands are wet or when standing in water. This will help prevent electrical shock and ensure safe usage.
- 4.** Do not expose the socket to excessive physical force or pressure, such as dropping or crushing. This can cause internal damage, which may lead to malfunction or increased safety risks.
- 5.** Only use cables and devices that are compatible with the UK Plug Universal Socket. Ensure that the cables are certified and meet the required standards to avoid overheating or potential electrical failures.
- 6.** If the connected device or plug shows any signs of damage (e.g., frayed cables, exposed wires, or scorch marks), do not use the socket. Faulty devices can pose a risk of fire or electrical shock.
- 7.** To minimize the risk of fire or electrical faults, disconnect the socket from the power source when not in use, especially if you're leaving the premises for an extended period.
- 8.** Periodically check the socket for any signs of overheating, such as a burning smell or discoloration. If you detect any of these signs, disconnect the socket immediately and inspect for damage or misuse.
- 9.** Make sure the plug is securely connected to the socket. Loose connections can lead to sparks, overheating, or even fire. Always ensure the plug fits firmly into the socket before use.
- 10.** Keep the socket out of the reach of children to prevent accidental shocks or misuse. Children should not be allowed to handle the socket or any electrical devices connected to it.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **<https://www.porodo.net/warranty>** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
