Before installing and using the product, please carefully read this User Manual to guarantee correct usage and keep it secure for future reference.

Features

1. Click to Close

Ensures automatic and precise alignment with the inner magnetic ring of iPhone 12 and subsequent models of mobile phones/tablets. This bracket is compatible with iPhone models from the tenth generation onwards, including iPhone 12 and newer mobile phones/tablets that feature bare metal (uncovered). These devices have a built-in magnetic suction ring; therefore, using a standard cover may interfere with the magnet's connection. If your mobile phone/tablet does not belong to the specified models, the following two alternative options can be utilized with cases:

1.1 Universal Magnetic Sheet Attachment:

- Suitable for various mobile phones/tablets.
- Adhesive magnetic sheets can be applied directly to the back of the device or the outside of a non-metallic case.

Note: Using this with materials rich in oils, such as liquid silica gel, may reduce adhesiveness and is not advised.

1.2 Magnetic Suction Case:

- Compatible with mobile phone cases that have a magnetic suction ring or a flat metal shell.
- These cases are readily available on the market and can be attached directly.

2. Stability comes from a Powerful Kernel

Equipped with 16 ring magnets, this device is designed for secure attachment to the iPhone 13/12 series. The powerful magnetic field ensures a firm grip. Simply place your mobile phone near the device, and it will snap into place securely. This has been rigorously tested: with a 20-second attach-and-release cycle, repeated 3,000 times, the magnetic force has been proven to exceed 20 Newtons.

3. Comfortable Viewing

Free yourself from the 'downward gaze' habit; liberate your hands and enjoy your entertainment effortlessly. This solution addresses the fatigue and neck strain that often plague avid watchers. Say goodbye to acid reflux from poor posture, eye strain, and the discomfort of frequently changing positions.

4. Durable Support

Featuring a dual aluminum alloy rod with a hose and triple reinforcement for stability, this structure offers superior load-bearing capabilities and strong magnetic adhesion, ensuring that it remains securely in place without detachment.

5. Flexible Arm Mechanics

Rotate the horizontal adjustment knob to position the support arm correctly, then secure by tightening. The arm offers a 360° horizontal swivel. Before tilting the arm vertically, press and hold the tilt button and adjust incrementally. With 15 distinct positions, each providing a 12° increment, the arm can be adjusted through a full 180° vertical range.

6. Unrestricted Adjustment

Experience fluid movement with the universal ball joint, allowing for multi-angle adjustments. The arm, constructed from high-density aluminum alloy clad in plastic, ensures stability and durability without compromise. Adjust angles effortlessly with just one hand for unparalleled flexibility.

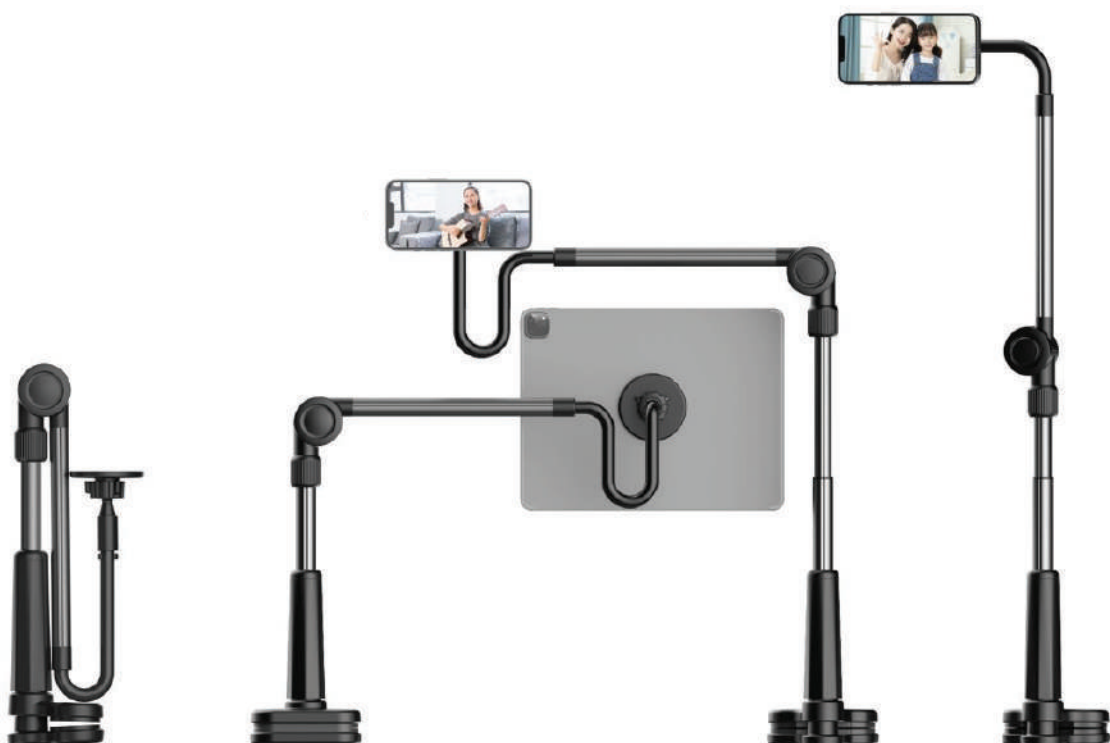

7. Adjustable Dual-Section Height

Each of the two segments extends smoothly, allowing you to fine-tune the height to your preference, securely locking in place without slipping or detaching.

8. Multi-Mode Integrative Device

Featuring an integrated design, this device allows for effortless transition between modeling modes, making it suitable for a broader range of applications.

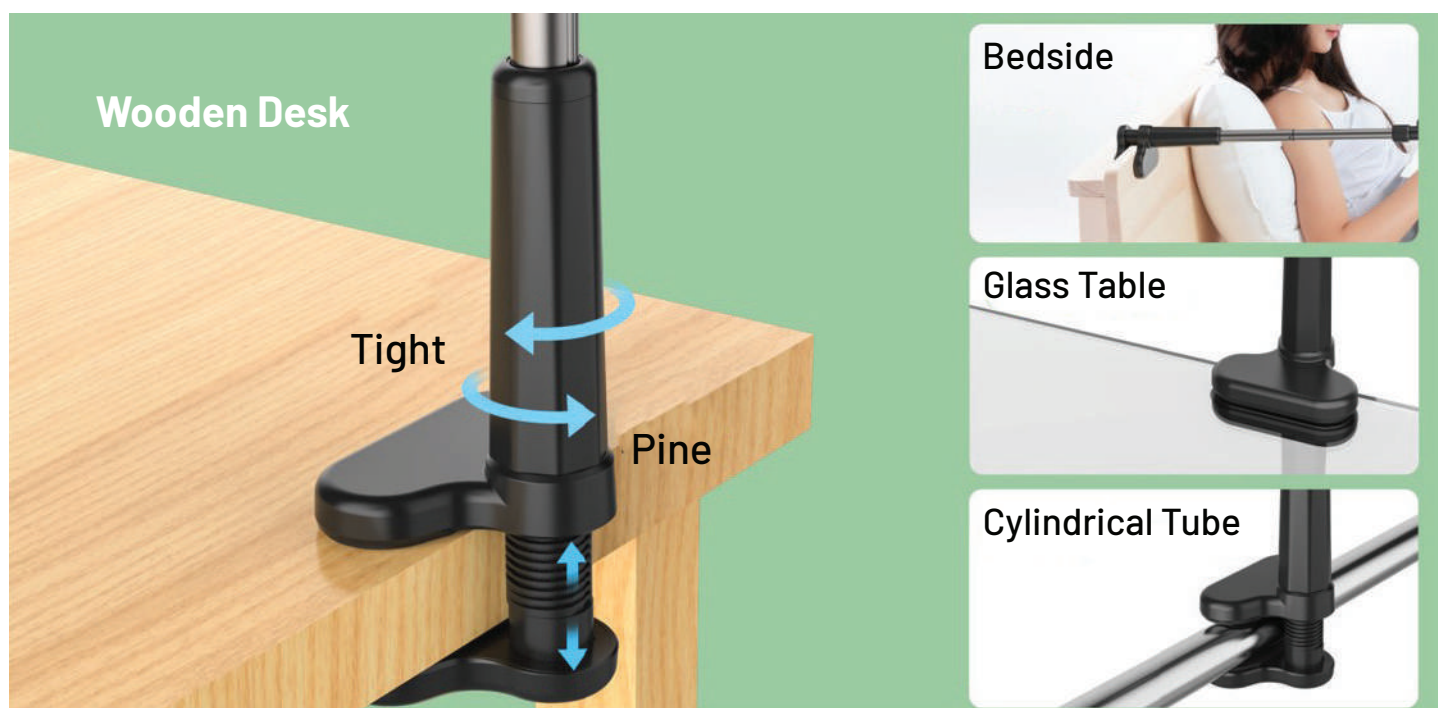

9. Versatile Placement

Discover the ideal spot effortlessly, enabling you to broadcast, record videos, and enjoy your favorite shows anytime, anywhere with total ease.

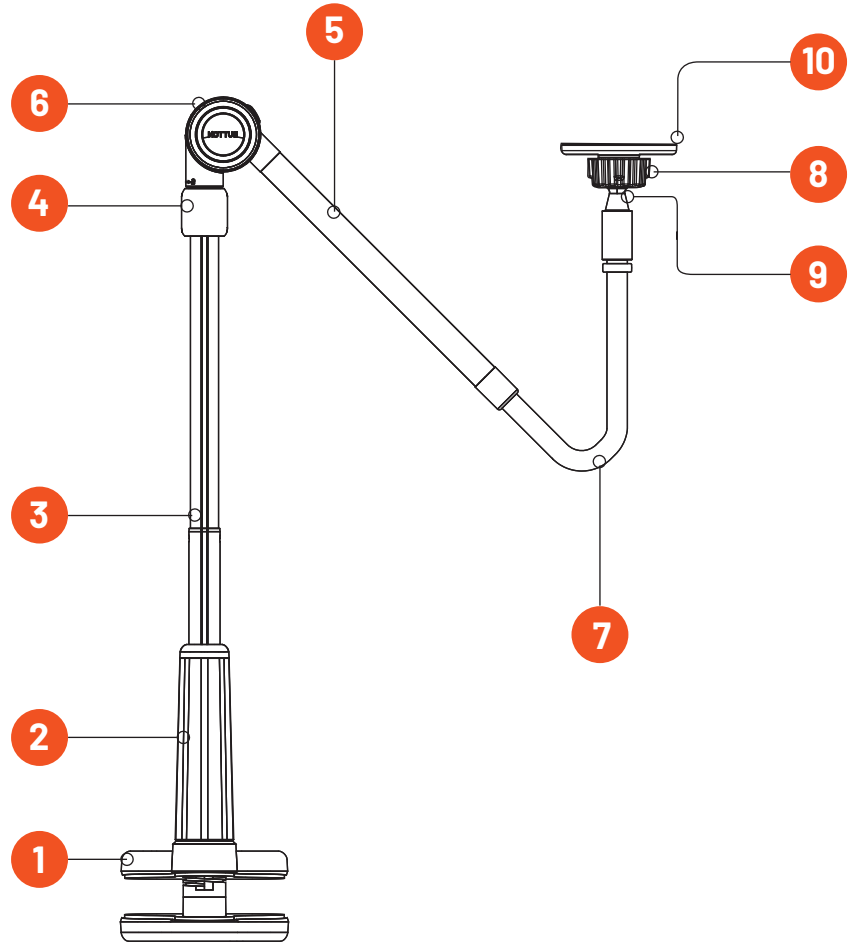

10. Secure Clamping

The clamp attaches securely to surfaces ranging from 1 to 75mm in thickness, featuring silicone protection that prevents marks and scratches.

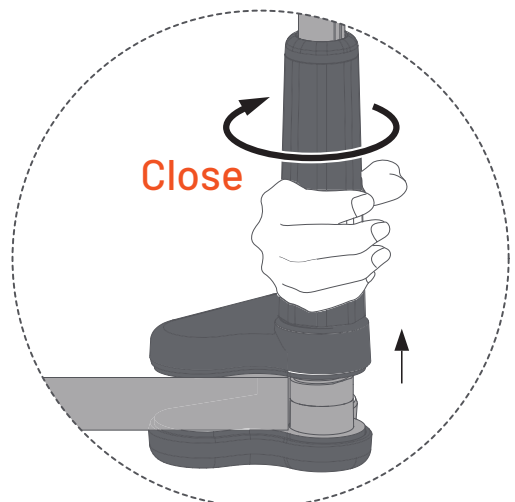

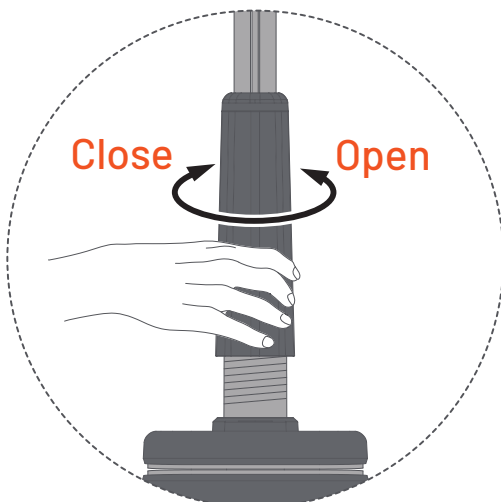

Schematic View

1. Fixing Clip
2. Thread Lock
3. Extendable Pole
4. Horizontal Rotary Button
5. Arm
6. Rotary Button
7. Hose
8. Knob
9. Universal Ball
10. Suction

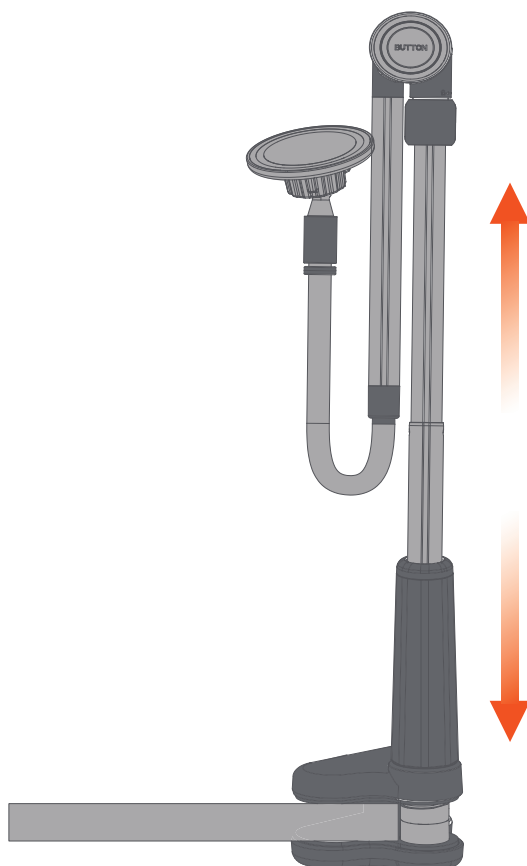

Instructions for Use

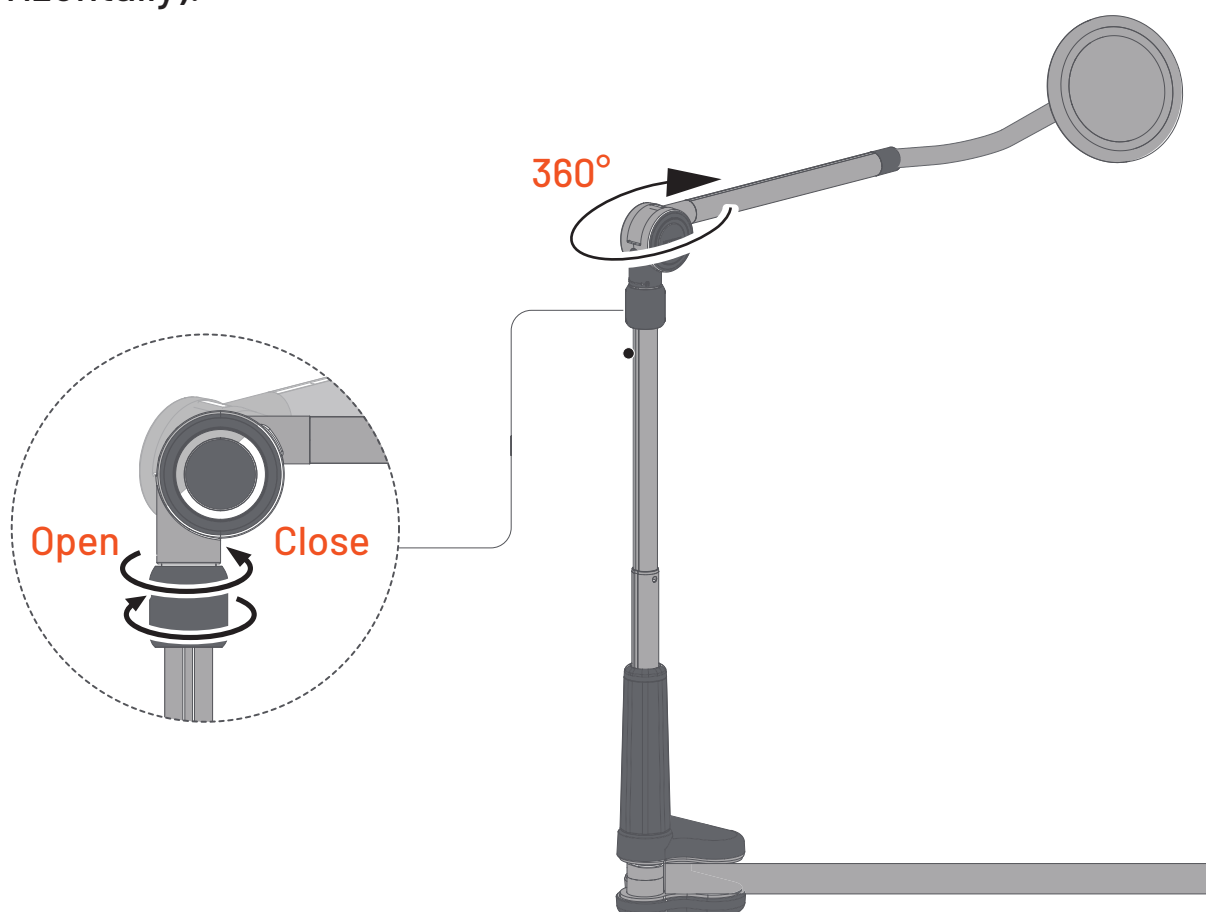

1. Unscrew the thread lock to open.
2. Loosen the fixing clip, position the bracket on the desktop or the head of the bed, and then tighten the thread lock.

3. Pull the two-section extendable pole with your hands to adjust the height.

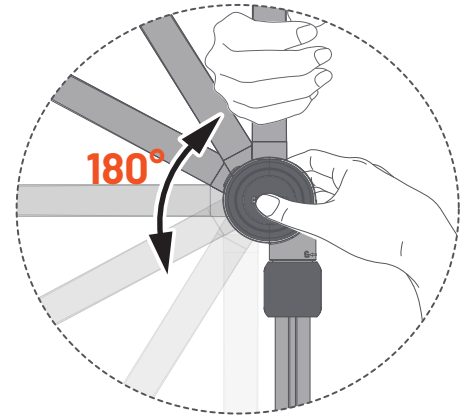

4. Loosen the horizontal rotary button, adjust the arm horizontally to a suitable position, and then tighten the horizontal rotary button (the arm can rotate 360° horizontally).

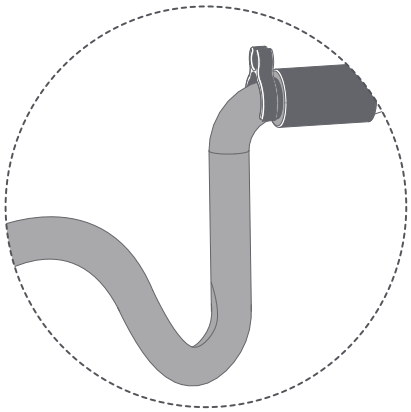

5. When making vertical adjustments, slightly lift the arm first, then press the circular button to adjust vertically. There are approximately 15 gears in total, each with approximately 12° adjustment range, allowing for a total vertical adjustment of 180° .

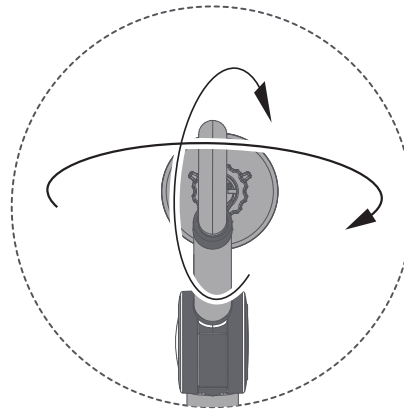

Press the circular button to adjust upwards or downwards.

6. Adjust the hose to the most suitable angle and position for your needs.

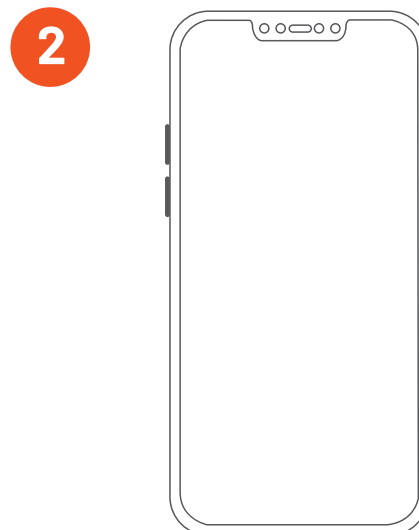

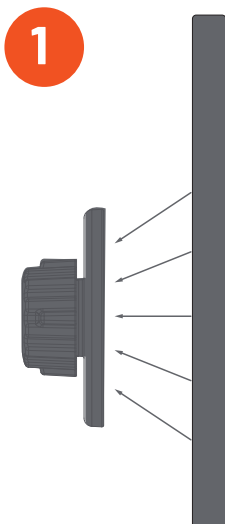

The hose is flexible and can be shaped as desired.

The universal ball joint can be adjusted freely.

7. Pick up your phone or tablet and align it with the suction cup to secure it to the bracket automatically.

Compatibility

The stand is compatible with iPhone 12 and later, as well as the iPad 10th generation in their bare form. This is due to these devices having a built-in magnetic suction ring on the back. Ordinary cases may interfere with the magnetic connection. If your mobile device is not one of the specified models or you prefer to use a case, you have two options:

1. Universal Type of Selective Magnetic Disc

This option has no model restrictions. It works with all mobile phones/cases. Simply affix the magnetic tape to the back of your phone or case.

Note: Phone cases made from oily materials might reduce the adhesive strength, like those made from liquid silicone gel, and are not recommended.

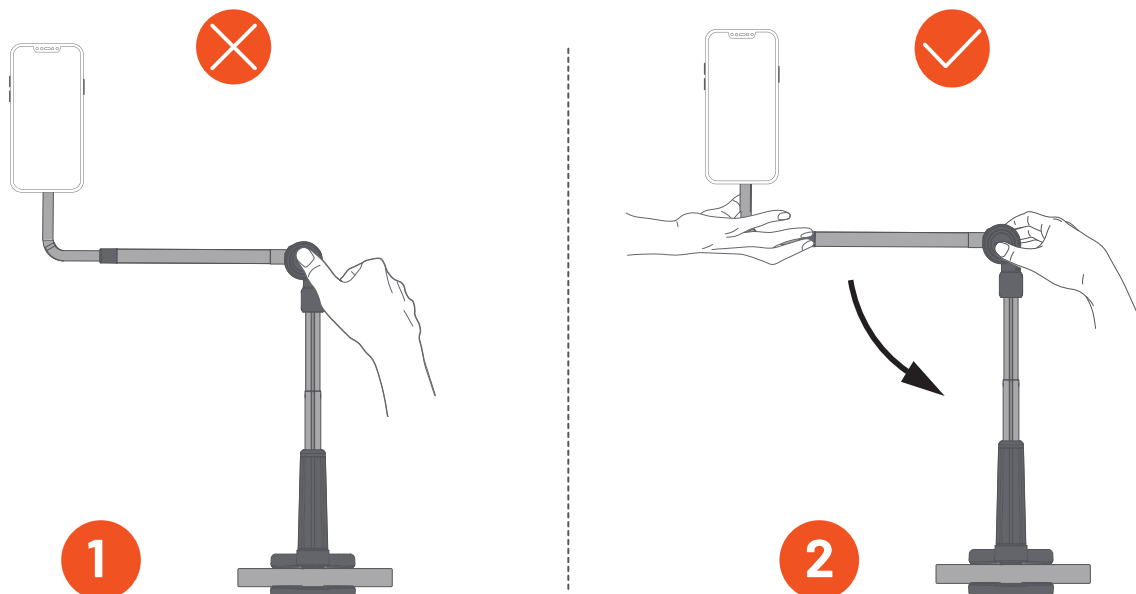

2. Wearable Magnetic Suction Case

Choose a mobile phone case with a built-in magnetic suction ring, available on the market, for a direct magnetic attachment.

Tips

When you need to adjust the arm upwards or downwards, please use both hands.

1. Avoid pressing the circle button directly to prevent the arm from collapsing suddenly, which may cause damage to personal items or injury (refer to Figure 1).
2. Firstly, support or lift the arm with one hand, then press the circle button with the other hand to carefully adjust the arm either downwards or upwards (as illustrated in Figure 2).

Precautions

1. Handle with care to avoid entrapment of hands during use.
2. This product is not for use by children under 14 years of age and should not be swallowed.
3. Do not disassemble or modify this product on your own.
4. Avoid placing this product in high-temperature environments.
5. Ensure the product is securely fixed before use to prevent malfunctions caused by external forces.

Specifications

Product Name	Porodo Lazy Man Stand with Magnetic Suction
SKU	PD-LMGS92-BK
Materials	ABS+PC/Aluminum Alloy+Silica Gel
Clamp Range	1-75 mm
Weight	345 grams
