

Bluetooth Speaker
Magnetic Wireless Charging

SKU:PD-STMWBS

Product Diagram

Specifications

Diameter: 60mm

Height: 28mm

Wireless Charging Compatibility: 5W, 7.5W, 10W, 15W

Speaker Output: 3W, 4Ω

Instructions

*To operate the Bluetooth speaker, long-press the media button. The speaker enters pairing mode indicated by a flashing green light. Enable Bluetooth on your phone and search for 'ST-Uniq' to connect. Once connected, the green light will flash slowly, signaling that music playback is ready.

*During music playback, a short press on the media button will toggle between play and pause. To skip tracks, short press the UP/Next button to play the next track or the Down/Previous button to revert to the previous track. For volume adjustments, long press the UP/Next button to increase volume or the Down/Previous button to decrease volume.

Charging Function

Wireless Charging: To charge wirelessly, place a magnetically compatible device, such as an iPhone, close to the product's magnet. The device will attach magnetically and begin charging wirelessly.

For wired charging, plug in the USB cable. The indicator light turns red during charging and switches off when the product is fully charged.

Special Features: Stereo Pairing

For stereo pairing, power on two speakers and the phone simultaneously. After they connect, double-click the media button on either speaker. You will hear a sound cue indicating the speakers have entered pairing mode. When the green light on both speakers flashes slowly, stereo pairing is successful. Activate Bluetooth on your phone, search for 'ST-Uniq' and connect. A confirmation sound will signal a successful stereo pair. Music played thereafter will output as stereo sound.
