

MAGNIFICO

SMART WATCH

2" Display | Double Tap Enabled
SKU:PD-MAGNIFICO

Magnifico Smartwatch

1. We appreciate your choice of our smartwatch. This manual offers a detailed guide for utilizing your device effectively. The smartwatch primarily interfaces with your cell phone via Bluetooth to enhance usability, providing numerous functions that assist with phone operation and personal health tracking. Please note that we may update the manual's content without notice.
2. The smartwatch is not waterproof to the IP68 standard; it is not designed to withstand rain, hand washing, swimming, heat exposure, or steam. If water damage occurs due to non-compliance with these instructions, warranty services will not be provided at no cost.

Operating Instructions

Key Functions:

1. **Upper right key:** Hold to power on or off. A single press accesses the menu interface, and another press returns to the previous interface. When in a different application, double press to cycle through menu options.
 2. **Lower right key:** Hold to power on or off your phone. When the phone is on, a single press locks or unlocks the screen. A double press returns you to the main menu from any application.
- Touch Gestures:**
1. Swipe left to open the quick function screen.
 2. Swipe right to access the split-screen interface.
 3. Swipe down for the control center.
 4. Swipe up to view messages, and swipe right to return from a function.
- 3.Dial Switching:** Rotate the dial to change the watch face.
- 4.Strap Replacement:** The straps are designed for quick release and are simple to change.

Charging Instructions

*The watch's charging port is magnetic, securing the cable when aligned correctly. It is compatible with standard 5V USB chargers and achieves a full charge in approximately 150 minutes.

***Caution:** Ensure the charging cable's contacts do not touch other conductive materials simultaneously to prevent short-circuiting or damage.

Connecting the Watch to a Cell Phone

To pair the watch with your phone, download and install the "FereFit" app.

1. For iOS/Android users, scan the provided QR code with your mobile browser or through WeChat. Follow the prompts to access the download within your browser.

- The provided QR code is for downloading the FereFit App.
2. Android users can find the FereFit app in Google Play or any other cell phone application store. iPhone users can search for "FereFit" on the Apple App Store to download the app.

Android/iOS

Note: Upon installing the app, you will receive several permission requests; please accept all to ensure full functionality between your watch and phone via Bluetooth 3.0 and 5.0 connections.

Bluetooth 5.0 Connection Method: After installing the FereFit app and enabling Bluetooth, a notification will prompt you to allow notifications. Tap 'OK', then select 'More' in the bottom right to scan for devices. Choose your watch's Bluetooth name "Magnifico" and connect. Note that some Android phones may require GPS activation to pair with the watch.

Bluetooth 3.0 Connection Method:
-Activate the watch's Bluetooth 3.0.
-Enable Bluetooth on your cell phone, then select the watch's name "Magnifico" from the list of available devices to connect.

Connection Verification: A successful Bluetooth connection is indicated by the Bluetooth icon on the watch's standby interface changing from blue to green, and then to grey when disconnected.

Troubleshooting: Due to variations in Bluetooth protocols across different phone brands, if the connection is unstable, you can try turning off the Bluetooth on your phone and then re-establishing the connection, or you may reset the watch to its factory settings.

Setting Up Incoming Mail Notifications: To manage notifications, navigate to 'Settings' > 'Application Management' on your device, find 'FereFit', and enable all permissions.

Note: If WeChat is active on your computer, your phone may not display notifications. To remedy this, add 'FereFit' to the power-saving whitelist to ensure notifications are received, especially when the phone's battery is low.

Troubleshooting Notifications:
If you do not receive notifications, remember the watch's notification feature is linked with your phone's. If your phone doesn't alert you, the watch won't either. Check your phone settings under 'Notifications' to ensure permissions for the relevant app are enabled.

Main Function Introduction

Encoder: Rotate the button on the standby interface to switch watch faces. Use vertical swipes to navigate the submenu; pinch to zoom in and out of the full-star menu, which allows for application access.

Split Screen: Swipe right in the dial interface to access split-screen mode for quick app navigation.

Dial Customization: Customize the watch face with pointer, digital, or app-derived dials.

Phone Integration: Make calls, view call logs, access contacts, and manage incoming calls directly from the watch. Vibration and ringtone options are available for notifications.

Contacts: Store up to 10 contacts from your phone directly on the watch via the FereFit app.

Call Records: Synchronize and access your phone's call history on the watch.

Dialing Keypad: The watch can dial out, allowing for call placement directly from your wrist.

Activity Tracking: Monitor daily step count, historical data, calorie burn, and distance walked. This data resets at midnight each day.

Messages: Receive notifications from social media platforms and messaging apps like Facebook, Twitter, WhatsApp, QQ, and WeChat.

Music Control: Use Bluetooth 5.0 to play music from your phone on the watch; Bluetooth 3.0 is available for song selection.

Heart Rate Monitoring: For accurate readings, wear the watch on the upper wrist area, above the bone.

Blood Oxygen Measurement: To measure, keep your arm still for about 20 seconds and start the feature to get the reading.

Blood Pressure: Begin monitoring on your device. For accurate readings, keep your hand flat and remain still for about 20 seconds.

Body Temperature: To start monitoring, keep your hand flat and steady. The measurement process takes approximately 20 seconds.

Alarm Clock: You can synchronize up to three alarms using the app. Alarms can also be configured directly on the watch.

Voice Assistant (Siri): By connecting to Bluetooth 5.0/3.0, you can activate the watch's voice assistant feature by speaking to it.

Sleep Monitoring: The watch tracks your sleep duration and quality from 21:00 to 9:00. This data helps you to optimize your rest and improve sleep quality. Access and manage your sleep data in real-time via the app.

Exercise Tracking: The watch supports a variety of sports modes, including running, walking, soccer, badminton, tennis, basketball, table tennis, cycling, and more.

Camera Remote: When your phone is unlocked, connect the watch via Bluetooth to control your phone's camera. Tap the watch to take photos, which are saved in your phone's photo album.

Find Phone: Activate this feature through the app to make your phone ring until you cancel it, helping you locate your phone if misplaced.

Weather Updates: With a Bluetooth connection, the watch displays the upcoming seven-day weather forecast.

Stopwatch: Utilize the stopwatch function for timing single events or multiple durations.

Breathing Guide: Adjust the watch settings to guide your breathing speed during exercises.

Calculator: Use the built-in calculator for simple arithmetic.

Customizable Menu: Select from various menu styles to personalize your user interface.

Settings: Make system adjustments within the watch settings.

Component Functions: Swiftly access features like heart rate, sleep tracking, weather, music, and positioning by swiping on the dial interface.

Women's Health Tracking: The watch includes a feature for tracking menstruation and ovulation periods, providing safety reminders.

Games: Enjoy integrated games like "Birds of Prey" directly on your watch.

Location Services: Upon connecting to Bluetooth 5.0, the watch can display your current location, provided you grant the necessary permissions on your phone.

Settings: Various local settings can be customized.

Constant Light Time: Configure the duration of continuous backlight illumination.

Screen Off Time: Set the time interval for the display to remain active.

Wrist Activation: Toggle the screen lighting feature on or off as needed by raising your wrist.

Brightness Adjustment: Adjust the screen brightness to your preference.

Do Not Disturb Mode: You can enable do not disturb mode for the entire day or for specific times only.

Drainage Function: Improve the ring's drainage by shaking your hand.

Password Setting: Create a password for security. If forgotten, it can be reset using the code '8888'.

Connect to Your Phone: Scan the QR code with your phone to link it and download the FereFit APP.

Power Saving Mode: Activate this mode to dim the screen and turn off vibration, conserving battery life.

Language Switching: Offers multiple language options. Choose as needed.

Time Setting: Sync the watch with the app or manually adjust the time.

Date Setting: Sync the watch with the app or manually set the date.

Restore Factory Settings: Reset the device to its original settings to resolve software issues.

Power Off: Turn off the watch.

About: View the watch model, software version, and MAC address information.
