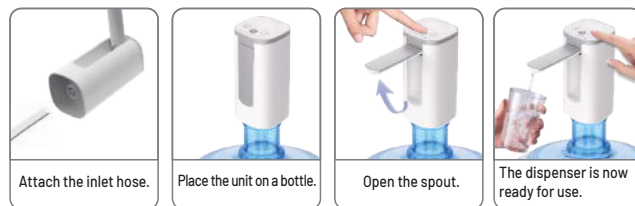

Image is for reference only

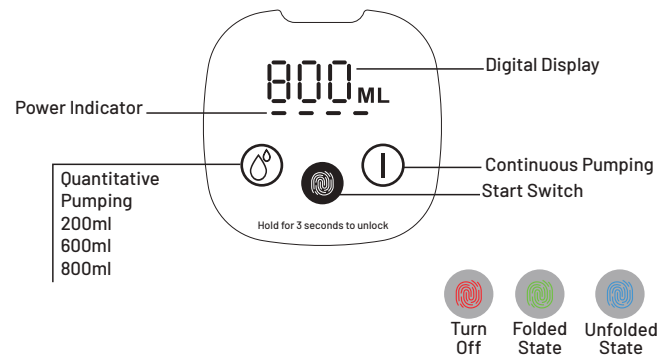

Attention

1. Please do not use this product to pump alcohol or other corrosive liquids such as oil, or water that is over 55°C.
2. Do not submerge the product in water for cleaning purposes.
3. The product has been tested by pumping water before delivery. If there is any residue water in the product, it can be disregarded.

Installation

Usage Guidelines

1. Charge the device until it reaches full capacity before the first use.
2. The Power Indicator will flash during charging and will remain lit when the device is fully charged.
3. Press and hold [Turn Off] for 3 seconds to activate standby mode. Then, tap [Start Switch] again to open the spout and select the desired function.
4. [Quantitative Pumping] For Quantitative Pumping, select the required volume of 200ml, 600ml, or 800ml. For Continuous Pumping, press [Continuous Pumping] to start and press again to halt the process. The device can pump for up to 3 minutes before stopping automatically.
5. To turn off the device, press and hold [Turn Off] for 3 seconds.
6. The spout will retract automatically if not operated for 1 minute.

Maintenance & Storage

1. Boil the silicone hose for a few minutes before initial use and every 2 months thereafter for hygiene purposes.
2. It is recommended to replace the silicone hose every 6 months to prevent hygiene issues.
3. Ensure there is no water left inside the unit before storing for extended periods.
