Working Environment

To ensure the router works properly, the recommended working environment of the router is as follows.

- a) Keep away from heat sources and keep ventilation.
- b) Place the router on a horizontal table.
- c) Place the router in a dust-free and dry environment.
- d) In thunderstorm, please remove the power supply and all cables from the router to avoid damage by lightning.

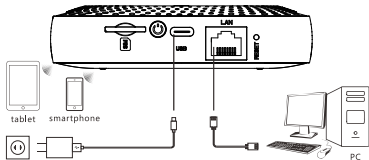

Installation Instructions

1. Insert the SIM card into the SIM slot in the direction marked by the silk screen.
2. Press and hold the switch key for 10 seconds, and then let go.
3. Use the mobile phone to search the Wi Fi signal sent by the device, and connect to the Wi Fi to experience the network.

Connecting Devices

You can connect the router in the following ways:

1. Wired connection

Before accessing the Web settings page, it is recommended that you set your computer to "Obtain an IP address automatically" and "Obtain DNS server addresses automatically".

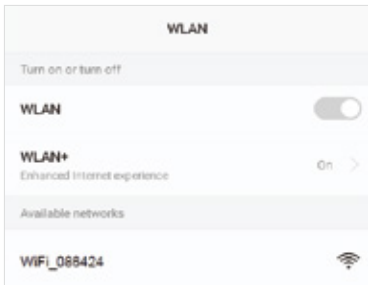

2. Connect via Wi-Fi

Use your phone to search the wireless router's wireless network and connect to the network.

Default Wi-Fi name (SSID): 4G-WIFI-XXXX

Default Wi-Fi password (Key): 1234567890

Device Login

1. Connect the Wi Fi signal transmitted by the device with a mobile phone or computer. See the device nameplate for details.

2. Open the browser (Google/Edge browser is recommended), enter the default IP address in the browser address bar, and enter the Web page. Enter the default password "admin" to enter the setting page.

3. After successful login, the display is as follows
