Indicator Status Guide

1. When the product is powered on, the indicator light will switch to standby mode.
2. When charging a mobile phone (5W/7.5W/10W/15W), the bright blue light will flash three times before switching to the breathing light. The light will turn off when the phone is fully charged.
3. When the watch is charged with 2.5W or fully charged, the indicator light will remain in standby mode.
4. When charging earphones at 3W, the green light will blink three times, then switch to the breathing light. The light will remain on until the charging process is complete.
5. When charging both the phone and earphones simultaneously, the indicator light flashes in two different colors at the same time.
6. The phone will serve as the primary guide, flashing the blue light three times before switching to the changing light. Once the phone is fully charged, the light will turn off, while the earphones continue to charge unaffected by the indicator light.

7. If the headlights are not needed during the charging process, they can be turned off by touching the button.
8. If the product detects that the phone and earphone parts are not aligned properly or if there are foreign objects detected, the red indicator light will flash.

Safety Instructions

1. Do not expose to fire or water, as this may cause a short circuit or leakage.
2. Avoid using the charger in environments with extreme temperatures, high humidity, or corrosive conditions to prevent potential damage or safety hazards such as short circuits or leakage.
3. Keep away from children and pets.
4. Protect the device from impacts.
5. **Note:** Plug into 30W or higher charging adapter.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.
