Quick guide of using amazon echo to control smart socket What you need to get started *Before using Echo to control your smart devices, make sure you meet the following conditions. • Stable Wi-Fi network which could access to Amazon server. (For mainland China users) • An Echo device, including Echo, Echo Tap, or Echo Dot. • An Amazon account. • Smart life app and a related account. • Smart socket. 1.Add devices in Smart life-app (Refer to App Instruction) *You can skip this part if you've already add some devices to your Smart life account, and in the meantime the devices' name are easily recognized. Sign in with the Smart life account, add the device, then change device name to a easily recognized word or phrase, like "Living room socket".	*Note: every time you change the device's name on Smart life app, Echo must re-discover before you control them. 1.2 Control devices by voice commands Now you can control your smart devices through Echo. You can use the following commands to control your devices (e.g., Living room socket): Alexa, turn on/off the living room socket.
2. Set up Amazon Echo and enable Skill 2.1 Set up Echo with Alexa app *You can skip this part if your Echo is already set up. Open the Alexa app by tapping the app icon on your mobile device. I. Make sure your Echo device is energized. II. Open the Alexa app by tapping the app icon on your mobile device. III. Type in your Amazon account and password, then tap "SIGN IN".	IV. Tap the home menu on the top left corner, select "Settings", then tap "SET UP A NEW DEVICE". V. Select your Echo model, choose a proper language, then tap "CONNECT TO WI-FI".	VI. Long press the dot button on the top of your Echo device until the orange light shows up, then tap "CONTINUE". When your phone is connected to Echo, tap "CONTINUE". VII. Select a Wi-Fi to let Echo have the access to the internet. Type in the Wi-Fi password, then tap "CONNECT". Echo may take several minutes to connect the network.	VIII. Tap "CONTINUE" when Echo is connected to the network. After an introduction video, tap "CONTINUE" to finish the setup. 2. Link Smart life account to Alexa 3.1 Tap "Skills" in the home menu, then search "Smart Life". Select "Smart Life" and tap "ENABLE" to enable the Skill.	3.2 You will be redirected to the account link page. Type in your Smart life account and password, don't forget to select the country/region where your account belongs to. Then tap "Link Now" to link your Smart life account. The country/region, the account, and the password must match with the contents of the registration. Tap "x" in the upper left of the page to back to Alexa app. 4. Control your smart devices through Echo 1.1 Discover devices Echo needs to discover your smart devices before it controls them. You can say "Alexa, discover devices" to Echo. Echo will discover devices which have already been added in the Smart life app. You can also tap "DISCOVER" to discover the smart devices. Discovered devices will be shown in the list.
