Product Overview

The Porodo 3000W Universal Power Strip is a versatile and high-performance solution for your power needs, offering 6 universal AC outlets and 6 USB ports. It comes equipped with built-in safeguards for added protection, a 24-hour timer for precise control, and a 3-meter UK cord for extended reach. The power strip features a safety power switch for easy control and peace of mind. Ideal for both home and office use, this power strip allows you to connect multiple devices simultaneously while ensuring safety and efficiency.

Specifications

Rated Voltage	AC 110V-265V
Rated Frequency	50/60Hz
Rated Power	3000W
Total USB Output	5V/4.1A Max
USB-C Ports	4x USB-C (5V/4.1A)
USB-A Ports	2x USB-A (5V/4.1A)
AC Outlets	6x Universal Sockets
Housing Material	PC Flame-Retardant
Power Cord	3m UK 3-Pin Plug
Product Size	32 x 103 x 243mm
Model Number	FWC100

Product Features

a. 3000W Power Capacity

The Porodo Universal Power Strip is designed to handle up to 3000W of power, ensuring that it can support high-demand devices like computers, TVs, or heavy-duty electronics. This high capacity allows users to plug in multiple devices without worrying about overloading the strip.

b. 6 Universal AC Outlets

Equipped with 6 universal AC outlets, this power strip can accommodate a wide variety of plugs from different regions and devices. Whether you have UK, EU, or US plugs, the universal outlets make it easy to connect all your electronics and appliances without the need for adapters.

c. 6 USB Ports

This power strip includes 6 USB ports that allow you to charge your smartphones, tablets, and other USB-powered devices efficiently. The USB-C ports are ideal for fast charging, while the USB-A ports offer versatile charging options for various devices, providing convenience and reducing the need for separate chargers.

d. Built-in Safeguards

Safety is a priority with the Porodo power strip, as it features built-in safeguards to protect your devices from electrical surges, overcurrent, and short circuits. This ensures that your valuable electronics are shielded from potential damage caused by unexpected power fluctuations.

e. 24-Hour Timer

The power strip includes a 24-hour timer that allows you to set when the power should be on or off. This is perfect for managing appliances that don't need to be running constantly, such as lamps, fans, or other devices, helping save energy and providing automated convenience.

f. 3m UK Cord

The 3-meter UK cord provides flexibility, giving you ample length to place the power strip in a convenient location without being restricted by short cables. This extended reach is perfect for larger rooms, desks, or setups where outlets may be far from where you need them.

g. Safety Power Switch

The integrated safety power switch lets you turn off the entire power strip with a single press, giving you an easy way to disconnect power to all your devices when they are not in use. This added convenience and safety feature reduces the risk of electrical accidents or power waste.

h. Compact and Durable Design

The power strip features a compact and sleek design that fits well into any home or office environment. Despite its high power capacity and multiple outlets, the power strip remains lightweight and easy to store, making it ideal for both stationary and portable setups.

Safety Precautions

1. Avoid Overloading

Ensure that the total wattage of all connected devices does not exceed the 3000W limit of the power strip. Overloading the strip can cause overheating, short circuits, or even fire hazards. Always check the power requirements of your devices before connecting them.

2. Keep Away from Water

Never expose the power strip to moisture or water. Do not use the strip in wet areas like bathrooms or kitchens unless specifically rated for such environments. Water contact can lead to electrical shocks or damage to the internal components.

3. Proper Ventilation

Place the power strip in a well-ventilated area to avoid heat buildup. Always ensure there is enough space around the device for air circulation.

4. Avoid Using Damaged Cords

If the power strip's cord or any of its components are damaged, do not use it. Damaged cords or exposed wiring can pose electrical hazards and increase the risk of fire or electric shock. Replace any damaged parts immediately.

5. Unplug When Not in Use

For added safety, unplug the power strip when not in use or when you are away from home for extended periods. This will help prevent power surges and minimize the risk of electrical accidents.

6. Check for Proper Grounding

Ensure the power strip is properly grounded when in use. Incorrect grounding can lead to electrical shock or damage to your devices. Always verify that the power strip is connected to a grounded outlet.

7. Keep Away from Flammable Materials

Keep the power strip away from flammable materials, such as paper, cloth, or furniture. Heat from electrical components could ignite these materials, leading to potential fire hazards.

8. Use the Timer Feature Wisely

When using the 24-hour timer, avoid leaving devices plugged in for extended periods of time. Set the timer according to the actual need to prevent overcharging or excessive energy consumption, which could lead to overheating.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
