Product Overview

The Porodo 60W AVERIN Multi-Port Car Charger is designed for fast, efficient, and simultaneous charging on the go. With a total output of 60W, it features three ports: one USB-A port with 30W PD (Power Delivery) and two USB-C ports with 18W QC (Quick Charge). The charger's sleek and durable aluminum alloy housing ensures long-lasting performance while providing universal compatibility for various devices. Whether you're charging your smartphone, tablet, or other electronics, this compact and powerful charger guarantees a speedy and reliable charging experience, making it the perfect companion for your car.

Specifications

Input	DC 12-24V
USB-A Output	5V/3A, 9V/2A, 12V/1.5A, 18W
USB-C Output	5V/3A, 9V/3A, 12V/2.5A, PD 30W
Total Output	60W
Material	Aluminum Alloy + PC
Product Size	28 x 28 x64.5mm
Model Number	PDCCR60W

Product Features

a. 60W Total Output

The Porodo 60W AVERIN Multi-Port Car Charger delivers a powerful total output of 60W, ensuring your devices charge quickly and efficiently. This robust power output supports fast charging for a wide range of electronics, keeping your devices ready to use when you need them most.

b. Triple-Port Design

With three ports—one USB-A and two USB-C—you can charge three devices simultaneously without compromising on speed. The USB-A port supports 30W PD (Power Delivery) while the USB-C ports offer 18W QC (Quick Charge). This makes it suitable for charging smartphones, tablets, and even some laptops at full speed.

c. Simultaneous Fast Charging

The charger is equipped to handle simultaneous charging of multiple devices with fast charging technology. Whether you need to charge your phone and tablet at the same time or three phones, the charger intelligently distributes power for fast and efficient charging without slowing down.

d. Aluminum Alloy Housing

Designed with a durable aluminum alloy housing, the charger is built to withstand the wear and tear of daily use. The sturdy material helps dissipate heat effectively, ensuring safe and consistent performance even during long journeys.

e. Universal Compatibility

The Porodo 60W AVERIN Multi-Port Car Charger is compatible with a wide range of devices, including iPhones, Android smartphones, tablets, and more. With versatile USB-A and USB-C ports, it can charge almost any device that supports fast charging, making it an essential accessory for any car.

f. Compact and Portable

The charger features a compact and sleek design that easily fits into your car's power outlet without taking up much space. Its lightweight and portable form make it convenient to carry and use while traveling, so you never have to worry about running out of power on the go.

Safety Precautions

1. Avoid Overloading the Charger

To ensure optimal performance and prevent overheating, avoid plugging in more devices than the charger is designed to handle. Always adhere to the recommended power output of the USB-A and USB-C ports (30W and 18W, respectively) for safe and efficient charging.

2. Do Not Use with Damaged Cables

Ensure that the cables you use with the charger are in good condition. Damaged or frayed cables can cause electrical hazards, short circuits, or slower charging times. Always replace damaged cables to maintain a safe charging environment.

3. Keep the Charger Dry

Avoid using the charger in wet or humid conditions to prevent the risk of electrical shock or short circuits. Always make sure the charger and its ports are dry before plugging it into your car's power outlet.

4. Properly Insert the Charger into the Power Outlet

Always ensure the charger is properly and securely inserted into the car's power outlet. A loose connection could lead to inefficient charging or potentially cause a short circuit.

5. Monitor for Overheating

While the aluminum alloy housing is designed to dissipate heat effectively, it's important to monitor the charger during use, especially if you're charging high-power devices. If the charger becomes unusually hot, disconnect the devices and allow it to cool before using it again.

6. Avoid Blocking Air Vents

Ensure that the charger is not obstructing any air vents in your car. Proper airflow helps prevent the charger from overheating and ensures its longevity and safe operation.

7. Use in the Appropriate Vehicle

This charger is designed for use in cars with standard power outlets (12V DC). Do not attempt to use it in vehicles with incompatible electrical systems, as it could lead to malfunction or damage to both the charger and your devices.

8. Keep Away from Children

For safety reasons, keep the charger out of children's reach as it contains small parts and electrical components that could pose a safety risk if mishandled. Always supervise its use in the vehicle.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
